Virginia Department of Forestry
900 Natural Resources Drive, Suite 800
Charlottesville, VA 22903

June 2001

FORWARD

This publication updates the **Primary Wood Processors** in the 1992 Forest Products Industry Directory. Directories for Secondary Forest Products and other forest-based resources should be available in the near future. It is based on a comprehensive survey conducted by field personnel of the Virginia Department of Forestry (DOF) and other available resources. The omission of any industry was unintentional. Any wood manufacturing industry in Virginia not listed, but would like to be listed in the next update should contact the local county forester's office or the DOF state office in Charlottesville, VA and give them the information needed. A form is enclosed to assist with collecting information. The listing of any industry in this directory does not constitute or imply a recommendation by the Department of Forestry.

The development of this publication was done in cooperation with the forest product industries of Virginia, USDA Forest Service Southern Research Station, Asheville, NC; Utilization & Marketing personnel from the southern states; and Virginia Department of Business Assistance. We greatly appreciate the time and cooperation of the businesses that provided us with information, and to John Scrivani for programming assistance.

In the near future, this publication will be available on-line. This will allow for quicker updates of information on new or existing companies. All information on-line should be updated quarterly. If any information needs to be corrected, please contact the DOF state office or Charlie Becker, Utilization & Marketing Forester.

e-mail: beckerc@dof.state.va.us

Information Form for All Forest Product Companies

The following form can be used to make any corrections or additions of information on any forest products company in Virginia. The information can then be mailed, faxed or called in. All information collected will be used to help improve markets for Virginia forest products. The more complete the information, the better ability we have of directing potential buyers to your products. If more than one operation is performed at a location (i.e. sawmill & millwork, etc.), please include information about each. If you have any questions, contact Charlie Becker, Utilization & Marketing Forester at 804-977-6555.

DIRECTORY INSTRUCTIONS

In the following sample listing, the Forest product firms are listed in each county as shown:

Albemarle

Augusta Lumber Co.
P. O. Box 68
North Garden, Va 22959

Contact: Howard Carr

Phone 804-977-6852 **Fax:** 804-296-084

Employee's:

50 - 99

Plant: Hardwood Sawmill

Product: **Rough Green** Lumber,
Pallet Stock

Species: Red Oak, White Oak,
Yellow Poplar

Description of Each Category:

Firm Name, Address, Phone- Firm Name and Address are listed in alphabetical order by county, and the Standard Industrial Code (SIC). Phone and fax numbers are listed if available.

Employee's- Gives range of employee class, if available.

Plant- Hardwood/Softwood Sawmill, Pulp & Paper Mills, Portable Sawmill, and Special Product Mills.

Products- Top three main products sold by firm, if available.

Species- Top three species of wood ranked in descending order by use, if available.

Virginia's New Area Codes:

***Beginning on June 1, 2001 the western and southern portion of the 804 area code territory will get a new area code; 434. Between June 1, 2001 and January 14, 2002 both 804, and 434 area codes will be active until January 15, 2002. At this time all calls must be dialed using the 434 area code.

***Beginning September 1, 2001 southwest Virginia will get a new area code; 276. Between September 1, 2001 and March 15, 2002 both 540 and 276 area codes will be active through March 16, 2002. At this time use of the old 540 and new 276 area codes must be used to place calls within or between area codes.

**The future of VIRGINIA is in the
protection of its forests.**

Teach the children well.

Fire is only one of the many enemies of our forests; others include insects and disease, severe weather and the conversion of productive forestland.
